

Embedding the culture and systems of organizational resilience

Press Release: ICOR Partners with Prologica to Bring Data Center Training to Portugal

FOR IMMEDIATE RELEASE

Lombard, IL USA, February 21, 2011 - - The International Consortium for Organizational Resilience (ICOR), an international non-profit professional development and credentialing organization, has partnered with Prologica, a Portuguese private company, dedicated to provide and develop information technology solutions and services, with a worldwide presence.

"ICOR is honored to be able to provide education and training in organizational resilience to the people of Portugal" said James Nelson, Chairperson of ICOR. "ICOR's mission is to enable organizations to embed the culture and systems they need to provide their goods and services in all conditions and situations. Having Certified Data Center Professionals designing and managing data centers is an important part of making data center operations more resilient. ICOR's courses in business continuity, crisis management & communications, data center management, organization resilience, social resilience, and risk management in the supply chain, support our mission of building resilient organizations."

The data center professional development courses The Certified Data Center Professional (CDCP), The Certified Data Center Specialist (CDCS), and The Certified Data Center Expert (CDCE) were developed by Edward van Leent from EPI-AP.

"Portugal is one of the few regions which we not serve yet on the world-wide map and we are pleased that it's now available in this part of the world, too," said Edward van Leent, Chairman & CEO of EPI. "We are pleased to have Prologica delivering our data center courses to Portugal which is yet another great endorsement of our training program which helps data center engineers and managers to bring world class data centers to top performance."

"To Prologica is an honor to have merited the preference of ICOR, a world reference in organizational resilience, as a partner for Data Center Management specialized training, in the Portuguese market", said Pedro Miguel Geraldès, Manager of Prologica's Training Academy. He added that, "The partnership with ICOR consolidates our strategy to offer the market a unique and differentiated offering in the field of management of data centers and IT infrastructures ". He adds: "We are confident in the receptiveness of professionals and companies for this type of training and committed to the success and development of this partnership with ICOR".
